

1 Supplementary Material

1.1 Expression Complexity

Table S1: Weights used in the expression complexity calculation

Node / Operator	Weight
Feature variable	0.00
Constant	0.50
Addition (+)	1.00
Subtraction (−)	1.00
Negation	1.00
Multiplication (×)	1.25
Sine (sin)	1.25
Cosine (cos)	1.25
Logarithm (log)	1.25
Exponential (exp)	1.25
Division (/)	1.50
Square	1.50
Cube	2.00
Power	2.00

1.2 Multiple Linear Regression (MLR) Results

Mathematical expression for MLR is:

$$\begin{aligned} y = & -274.0021 + (2.3574 * \text{Soil}) + (2.7173 * \text{Slope}) + (0.1429 * \text{Rain}) \\ & + (7.9840 * \text{LULC}) + (5.8639 * \text{Lithology}) + (-22.2194 * \text{Lineament density}) \\ & + (-0.2859 * \text{Geomorphology}) + (35.1481 * \text{Drainage density}) \end{aligned} \quad (1)$$

1.3 Highest- R^2 Single-Objective Expression

Complete mathematical expression for highest- R^2 single-objective symbolic regression is:

$$\begin{aligned}
& (((((\text{Lithology} * \text{LULC}) - (\log(((\text{Lithology} * \text{LULC}) ^ (((0.32 - (\text{Drainage density} + (\text{Slope} - \\
& (\text{square}(\sin((\text{Lithology} + \text{Lithology}))) * (\text{Lithology} + \text{Lithology})))))) + (((\sin(\text{Lineament density}) + \\
& (((-3.33 * \text{Lineament density}) - \text{LULC}) + \text{Soil})) + \text{Slope}) - (\sin((\text{Lithology} ^ (0.32 - \sin(\sin((\text{Lithology} * \\
& \text{LULC})))))) * \text{Lithology}))) + \text{Slope}) - (\sin((\text{Lithology} ^ (0.32 - \sin((\text{Lithology} + (\cos(\text{Drainage density}) \\
& ^ \sin((\text{Lithology} ^ ((\text{cube}(((\text{square}(((0.32 - (\text{Drainage density} + (\text{Slope} - (\text{square}(\cos(-0.59)) * \\
& ((\sin((\text{Lithology} + \text{Lithology})) - \text{LULC}) + \text{Soil})))))) + (((-3.33 * \text{Lineament density}) - \text{LULC}) + \text{Soil}))) \\
& * (((0.32 - \sin((\text{Lithology} + \text{Lithology})) - \text{LULC}) + \text{Soil})) - \text{LULC}) + \text{Soil}) - \sin((\text{Lithology} * \\
& \text{LULC})) * \text{Lithology})))))) * \text{Lithology}))) + (0.32 - (0.32 - (((0.32 - \sin(((\text{Lithology} + \text{Lithology}) * \\
& (((-3.33 * \text{Lineament density}) - \text{LULC}) + \text{Soil}))) * \text{Lithology} + (0.32 - \sin((\text{Lithology} + ((\text{Lithology} * \\
& \text{LULC}) ^ (((0.32 - (\text{Drainage density} + (\text{Slope} - (\text{square}(\cos(\text{square}(\exp((((\text{Lithology} - \text{LULC}) / -4.63) \\
